GENERAL INFORMATION

Our Location

Our Nursery is on Valley Road just off New Hampshire Route #115 (one mile from the U. S. Route #2 intersection) in the town of Jefferson, N. H. We are in the heart of the famous White Mountains Region. At the Nursery the elevation is 1,100 feet, making it one of the coldest spots in New England, practically in the shadow of Mount Washington.

The gardens will be open to visitors on Saturdays and Sundays, only, and by special appointment. We shall be very pleased to show you our hardy field-grown plants.

How to Order

When ordering please name both the genus (boldface capitalized word) and the variety.

Kindly indicate two or three substitutes, as we cannot be sure of always having a supply. In case of crop failure we will refund your money, or place on back order—as you prefer. Orders will be filled in same rotation as received. Please order early.

Orders will be sent parcel post special handling unless otherwise specified. A packing charge of 25c for each order must accompany your remittance.

Purchaser pays all transportation charges. Add 15% of total order if to be delivered east of the Mississippi River, and 25% if west of that river. Excess refunded.

Minimum order: \$3.00. Make checks payable to: Donald J. Lennox. Full remittance must accompany all orders.

Our shipping season will be May 1 to June 15, and the month of September.

Fall planting is recommended for all early spring flowering plants.

All plants are offered subject to being unsold upon receipt of order.

Our plants are all grown outdoors in field conditions in an extremely rugged climate and should be full of real vitality for your gardens.

This listing good to January 1, 1964.

Guarantee

We endeavor to send out only strong young plants in good condition. Our responsibility ends upon delivery in good condition to the carrier. We will accept no responsibility for damage to plants in transit or for customer's subsequent failure with them due to weather, poor soil conditions, or improper handling. We will rectify mistakes for which we are responsible if notified within five days of receipt.

HARDY ROCK GARDEN AND ALPINE PLANTS

ACHILLEA. Good easy plants for the rock garden. Happy in poor soil and full sun.	
Aurea (5") Flat yellow heads over feathery mats	.50
Lewisi (8") A first-rate garden plant. Yellow	.50
Millefolium Crimson Beauty (15") A deep crimson pink form of the common yarrow. A good border subject	.50
Moonlight (6") Light yellow over fine fernlike leaves. Continuous bloomer. Easy	.50
Tomemntosa (6") The flat-topped golden flower heads cover the plants in mid-summer. The creeping plant is always a mat of beautiful soft gray green foliage. Lovely when frosty	.50
Umbellata (6") A dwarf non-spreader with cream colored flower heads in June	.50
AJUGA. Indispensible where a heavy leaved ground cover is needed in sun or shade, on any soil. The flowers are attractive, too.	
Brockbanki (6") Bronzy foliage and blue flowers. Not a fast spreader	.50
Genevensis Alba (6") White flowered form of the familiar ground cover	.75
Gehevensis Pink Spires (6") A choice ajuga with really pink blooms	.75
Metallica Crispa (6") Bronze green foliage and blue spires. Striking red purple foliage in winter	.75
Reptans (6") Standard ground cover. Blue flowers. Spring	.40
Variegata (4") Very attractive variegated foliage. Blue spikes of flowers. Striking combination. May	.75
ALCHEMILLA Pubescens (8") A very different foliage plant with large roundish scalloped leaves, and fluffy green flowers	.50
ALLIUM. The flowering onions are hardy and easy subjects. The attractive blooms are long lasting in any sunny situation.	
Cyaneum (4") Tiny grass-like Allium with fluffy heads of true blue stars in July	.75
Mt. Cenis (10") Rosy heads of bloom in July. Sun	.75
Schoenoprasum (12") (Chives) Not only are they good to eat, but a real show-piece when in bloom. Good for cutting	.40
Senescens Glaucum (8") Gray foliage beautifully twisted and curled. Umbels of pink bloom in mid-summer	.75
ALYSSUM. Lovely plants of gray which look best creeping down over a large rock surface.	
Argenteum (10") Blooms late with billowing masses of tiny yellow flowers	.75
Montanum (6") Gray-leaved tufts emitting eight inch runners ending in ample heads of bright yellow. June.	.75

ANCHUSA Myosotidiflora (8") Large heads of tiny forget-me-nots over large heart-shaped leaves. Part shade. Acid	.75
ANDROSACE. Perfectly lovely alpine plants, easy to grow in well drained sunny locations. They like a little lime in the soil make-up.	
Sarmentosa (6") Large androsace with pretty rosettes of gray green foliage sending up flat heads of pink primula-like blooms in early summer. Easy in sun	.75
Sarmentosa Chumbyi (3") Woolly rosettes that send up 3" umbrellas of clustered clear pink flowers. A great charmer in May. Likes a bit of lime and good drainage, but is perfectly hardy	.75
Sempervivoides (3") In the sarmentosa group. Smooth leaved. Lilac flowers in June	.75
ANEMONE Nemorosa Robinson (6") Beautiful soft blue flowered Anemone. Early spring. Part shade. Lime.	.50
Pulsatilla (12") Rings in the spring with huge purple bells	.75
Sylvestris (12") Beautiful snowy cups in May make this one of the springtime treasures. Part shade, leaf-mold and a touch of lime	.75
ANTENNARIA Dioica Rosea (2") A grand ground cover for a dry and lean spot. Delicate pink "pussy toes" in spring	.50
Rosea (6") Red "pussy toes" with white centers. Excellent ground cover in hot, dry soil	.40
ANTHEMIS Aizoon (Achillea Ageratifolia) (6") Gray mats. White flowers in June	.50
Biebersteiniana (12") Cut-leaved white, woolly plants. Yellow marguerites	.75
Hausknechti (8") Multitudes of dancing daisies over gray fernlike leaves. Summer	.75
ANTHERICUM Liliago (15") Spikes of white lilies over grassy foliage	.75
ANTHYLLIS Montana Rubra (6") Rare, hardy and easy. Heads of pea-like flowers in red	.75
AQUILEGA Canadensis (15") Our own wild columbine, so loved by the hummingbirds. Red flowers with yellow centers	.50
Flabellata Nana (8") Blue with white center. Dwarf. Large flowers. From Japan	.75
Star of India	.75
ARABIS Early spring blooming, and among the easiest to grow anywhere in the sun. The foliage is especially nice.	
Albida Fl. Pl. (8") Beautiful double arabis. Gray green foliage. Prolific. Sun	.75
Alpina Snowcap (6") Dwarf. Pure white variety. Very fine	.75
Androsacea (2") Tight rosettes like Androsace. White flowers	.75
Japonica (8") Interesting tight rosettes; pyramids of white	.75
Nuttalli (6") Neat low white. American	.50

Procurrens (12") Shining green mats; large white blooms	.50
Sturi (4") A rare and compact Arabis with white flowers. Very good	.75
ARENARIA Low mat forming hardy plants with appealing little flowers, and are the best and easiest of rock plants.	
Capillaris Formosa (3") Low masses of fleshy foliage with loose clusters of neat white flowers	.75
Larcifolia (6") Dark green finely cut foliage in mats. White flowers in June	.75
Montana (4") A most beautiful rock plant for that choice spot. Lovely upward-facing white cups in profusion. June	.75
Verna Caespitosa (1") A real ground hugger in bright green, with tiny white pinheads for flowers. Between stepping stones	.50
Verna Caespitosa Aurea (1") Beautiful golden green moss. Tiny white flowers. Rare	.50
ARMERIA Cape St. Vincent (4")	.75
Labradorica (6") Shell pink tufts of bloom on wiry stems over the tight mounds of green	.75
Lauchiana (6") One of the best rock plants; producing myriads of rose crimson heads on wiry stems above the neat cushion of fine grassy leaves	.75
Setacea Alba (3") Neat mounds; white balls in spring	.75
ARTEMISIA Schmidtiana Nana (12") Perfect domes of lovely soft gray foliage. Wonderful for accents in the rock garden	.75
ASPERULA Pontica (1") Gray-green cushion; rosy flowers. Spring	.75
ASTER Many really choice rock garden subjects are included. Require good drainage in full sun in any kind of soil.	
Alpinus (6-10") Large aster flowers in shades of lavender and blue. June	.50
Alpinus Alba (6") White flowered form of the above	.50
Alpinus Goliath (8") One of the largest and most beautiful aster flowers. A true alpine	.75
Alpinus Spring Charm (4") Large lavender pink asters. Choice	.50
Farreri (12") Beautiful aster. Mauve with golden center. China. July	.75
Kumleini Roseus (12") Masses of bright blue-violet in late summer	.75
Likiangensis (3") Farrer calls it the most exquisite high alpine aster ever seen. From neat basal rosettes come 3" stems with large single imperial purple asters of great charm. Give good drainage and plenty of humus. June	1.00
Linariifolius (10") An easy American species of late summer	.50
Subcaeruleus Wartburg Star (15") A most beautiful aster flowering in June. Lilac-blue	.75

AUBRIETA The many softly blending shades of aubrieta on low carpeting plants are a joy in the early garden. Easy and hardy.	
Borsch's White	.50
Purple Robe (3") A good purple blue color	.50
BELLIS Shortcake (4") Profuse small pink daisies all summer. Hardy and easy. Sun	
	.50
BELLIUM Minutum (2") Wee daisy. White, shaded pink. Choice and easy	
	.75
BERGENIA Cordifolia (15") Large round leathery leaves, nearly evergreen, send up astounding heads of saxifrage flowers in early spring. A showy and hardy plant	
	.75
BETONICA Grandiflora (12") Large heads of purplish flowers rising above really attractive abundant leaves. Late June	
	.50
CAMPANULA Because of their great beauty and later blooming habits, the bellflowers are among our best loved rock garden subjects. Lime is appreciated.	
Alliariaefolia (18-24") White flowered on spikes in July. A good border perennial	
	.75
Carpatica Alba (10") The white flowering form of the Carpathian Harebell. Beautiful large white bells nearly all summer	
	.75
Cochlearifolia Miranda (3") Nodding light blue bells in great numbers	
	.75
Cochlearifolia Miranda (Lohbrunner form) (4") Light blue pendant bells. A treasure	
	1.00
Garganica (3") Wide open bells of violet. Close mounded plants for crevices or walls	
	.75
Garganica Major (3") Fine hearty plants. Large open bells	
	.75
Glomerata (12") The cluster-head campanula. Deep violet	
	.75
Glomerata Acaulis (3") Dwarf, choice form of Glomerata. Clusters of deep violet. Summer	
	1.00
Petiolata (12") Large dark blue. Native of Alaska	
	.50
Pusilla (3") Pale blue nodding bells. June-July. The Alps	
	.50
Pusilla Alba (3") White form of Pusilla. Dainty and beautiful	
	.75
Rotundifolia (15") English bluebells. Standard plant ..	
	.50
Rotundifolia (Form Linifolia) (12") Handsome harebell from the Alps. Similar to the English harebell	
	.50
Sarmatica (10") Very lovely and easy. Large silvery blue bells	
	.75
CENTAUREA Montana Alba (15") The white flowered form of our old friend the Ragged Robin	
	.50
Montana Blue (15") Commonly known as Ragged Robin. Large blue shaggy blooms in profusion. A good border perennial	
	.50
CERASTIUM Alpinum Lanatum (2") Gray green wooly tufts with large white flowers. Likes very good drainage and full sun. May	
	.75

CHRYSOGONUM Virginianum (3")	June to snow. Low, slowly creeping plants produce an endless parade of bright yellow daisies. Native	.50
COREOPSIS Auriculata (6")	Large golden yellow blooms. August	.50
CORYDALIS Lutea (10")	Golden flowers on fine-cut foliage all summer. Likes some shade	.75
CYMBALARIA Pilosa (Kenilworth Ivy) (2")	Tiny lilac snapdragons on trailing ivy-like vines. Ground cover	.40
DIANTHUS	Pinks are indispensable for the sunny, poor spots. Their showy and fragrant blooms are always a joy. They appreciate a bit of lime from woodashes or ground limestone.	
Alpinus (3")	One of the most beautiful "pinks." Rose flowers. A true alpine. Good drainage	.75
Arenarius (8")	Fine airy fringed flowers on tall wiry stems. July	.75
Atrorubens (6-9")	Large flowers in a head of bloom over grassy mounds. From the Alps of Europe. Crimson scarlet. June	.50
Brevicaulis (3")	High alpine. Close tight mat, and rose-mauve flowers with yellowish reverse	.75
Caesius Splendens (6")	A variety of Dianthus Caesius well worth having	.50
Deltoides (Maiden Pink) (10")	Rose pink masses of bloom cover the low cushiony plants in July	.40
Deltoides Alba (6")	Pure white form of above. Excellent contrast	.50
Deltoides Brilliant (10")	Deep crimson form of the maiden pink. Very showy and valuable	.75
Neonus (8")	A rare and unusual pink. White lacy blooms on very slender stems in August	.75
Peristeri (1")	Low mats of fine foliage, and profuse small pink flowers all season. Choice	.75
Plumarius (Old-fashioned Spice Pinks) (8")	Well remembered is the spicy old-time fragrance of these profuse double pink blooms. Solid blue gray clumps of grassy foliage	.50
Royi (3")	Hybrid of Neglectus. Bright pink flowers. Summer	.75
Subacaulis (1")	Carmine flowers in June. From the Alps	.75
Tiny Rubies (4")	Tiny double pinks sprinkling the gray green mounds of foliage are so aptly named. Choice	.50
Waitham Beauty (6")	Crimson pinks of great beauty. Originated in Canada	.50
DICENTRA Formosa (12")	A western native dwarf bleeding heart. Rose pink hearts in clusters all summer. Semi-shade and moist	.50
Sweetheart (6")	The lovely pure white dwarf Bleeding Heart. Choice. Easy in part shade	1.00

DORONICUM	Caucasicum	Magnificum	(10") Showers of large yellow daisies in May. Not too large for the rock garden. Very easy	.50
DOUGLASIA	Montana	(3") Compact tufts. Rose pink flowers. American	1.00	
DRABA	Mountain plants of easiest culture, and great appeal. They like crevices in the rock and full sun.			
	Aizoon	(6") Small pale yellow flowers over large rosettes. Lime	.50	
	Flatnitzensis	(4") Beautiful white flowers in early spring. Easy	.50	
	Olympica	(4") A very choice rock plant with delightful tight cushions of fine green foliage, and clear yellow blooms on short stiff stalks. Early. Easy and beautiful. Sun and good drainage	.50	
	Siberica	(4") A very nice early bloomer. Showers of spring yellow cover the green spreading mats in May. Easy and very good in sun	.50	
DRACOCEPHALUM	Tanguticum	(12") A fine blue accent plant that likes to stay at home. Part shade. July-August	.75	
DRYAS	Charming alpine ground covers for open, well-drained situations. Interesting large flowers and fluffy seed heads.			
	Octopetala	(4") Really a prostrate alpine shrub making a fine ground cover of elongated small oak-like leaves, and sending up beautifully shaped open stars of creamy white. Sun and ordinary garden soil.	.75	
EPIMEDIUM	Most decorative foliage and pretty dancing, spurred flowers. Give them shade and plenty of humus.			
	Alpinum	Rubrum	(10") Red flowers. Fine foliage	.75
	Lilaceum	(10") Lilac pink flowers	.75	
	Niveum	(10") Pretty little butterfly-like flowers in clusters above the decorative foliage. Choice!	.75	
ERIGERON	Simplex	(8") Lavender pink native of the Rockies. Flowers similar to single asters. Sun and ordinary soil	.50	
ERYSIMUM	Kotschyanum	(6") Mass of golden flowers. Charming	.75	
	Pumilum	(10") Yellow masses of long lasting flowers. Easy in sun	.50	
EUPHORBIA	Epithmoides	(15") May brings the happy combination of spring green and lemon yellow bracts. Very showy and easy	.75	
FESTUCA	Glauca	(8") Steel blue tufted grass of great beauty and usefulness. Does not spread	.50	
FILIPENDULA	Hexapetala	(15") Very lacy masses of leaves send up heads of fluffy white stars on swaying stems. June	.50	
GERANIUM	Easy and hardy subjects for sun or part shade. The showy blooms come in exciting colors and the blooming period is long. Any soil.			
	Alpenglow	(6") Large deep red flowers on low creeping plants. June	.75	

Dalmaticum (8") Large bright pink flowers on trailing stems. Rare	.75
Endressi (10") Beautiful rose flowers in mid-season	.50
Grandiflorum (12") Blue saucer shaped flowers for a long time	.50
Lancastriense (6") One of the most beautiful geraniums. Low growing and fine leaved. Lovely shell pink flowers	.75
Macrorrhizum (10") A compact geranium with pink flowers. Recommended	.50
Maculatum (15") Mid-summer blooms of light purple	.50
Maculatum Album (15") A beautiful white flowered form	.75
Pylzowianum (6") From Tibet. Flowers beautiful and pure clear rose. Rare and choice	.75
Sanguineum Album (8") White compact form of Sanguineum	.75
Wallichianum Buxton's Blue (12") Pearly blue cups over ample low foliage. Lovely color. June	.75
GEUM Borisi (10") The Balkans have given us this hardy orange scarlet variety	.50
Bulgaricum (12") Flame orange flowers over large leaves in July. An easy and permanent Geum	.75
Fire Opal (15") A new Geum with typical foliage and flaming red flowers	.75
GLOBULARIA Vulgaris (12") Unusual and interesting. China blue globular heads of bloom on wiry stalks over the low mats of strap leaves. Easy	.50
GYPSOPHILA Repens Rosea (2") Rosy pink blooms in quantity in July. A sturdy perennial; a beauty for the wall garden; or over a large rock face	.75
HELIANTHEMUM Sun loving, low growing shrubby plants covered in summer with wide single or double glistening blooms of great clarity of color. Easy in poor soil in well drained positions	
Buttercup (8") Covered in June with bright yellow suns for a long time	.75
Mrs. Mould (8") Fringed salmon rose	.75
HELICHRYSUM Plicatum (8") Hairy foliage, soft and gray, throws up large flat heads of clearest yellow blooms. Unusually nice	.50
HEUCHERA The Coral Bells are hung in numbers at the top of tall wiry stems springing from ornamental tufts of leaves at the ground level. Always decorative.	
"Best Pink" (15") This unnamed variety of Coral Bells is the best and largest pink we have. Very prolific	.75
Perry's White (15") Choice. Creamy white clusters of bells	.75
Pluie de Feu (15") Bright red bells in profusion all summer. Choice	.75
Villosa (15") A good ground cover; tall open wands of creamy flowers. Native	.50

HIERACIUM Bombycinum (6") Its wooly foliage is dense and charming, and the large yellow flowers in July are just right. Not a spreader	.50
HIPPOCREPIS Comosa (3") Neat masses, heads of gold pea-shaped flowers. Good drainage and lime	.75
HORMINUM Pyrenaicum (8") Dark, scalloped rosettes, which are beautiful in themselves, send up spikes of purple-blue. June	.75
Pyrenaicum Roseum (8") Rose form of the above. June	.75
HOUSTONIA Serpyllifolia (2") Tiny matting trailer with myriads of "bluet" blooms. Moist, rich sandy soil. Part shade	.50
HUTCHINSIA Alpina (3") A tiny carpenter from the Alps. Tufts of tiny dark green frilly leaves, and masses of white flowers. May	.75
HYPERICUM Polyphyllum (6") Prostrate, fine-leaved bushes. Large shining yellow flowers. Light open soil	.75
Rhodopeum (8") Gray leaved with glossy gold flowers. Blooms a long time	.75
IBERIS Shrubby evergreen mats with great displays of late spring bloom.	
Little Gem (6") A compact white flowering dwarf. Late flowering	.75
Sempervirens (10") The standard perennial Candytuft. Indispensible white display in June	.75
Snowflake (8") White mats of showy flowers in June	.75
INULA Ensifolia (10") Deep golden daisies. Late season	.75
IRIS The dwarf Iris is of the right stature for the rock garden. All are hardy and easy	
Cristata (5") Soft blue native of the Blue Ridge Mountains. Very fine and perfectly hardy	.50
JASIONE Perennis (8") Nice fluffy balls of blue in profusion, from the low mats of hairy leaves. Easy in sun	.50
LAMIUM Maculatum (12") A member of the mint family. An interesting plant-for the larger rock garden and easy to grow. The flowers are purple blue and numerous	.50
LINARIA Globosa Rosea (2") Neat ground cover; tiny pink snapdragon flowers. Drainage and part shade	.50
LOTUS Corniculatus (3") A charming trailer for walls or rock garden. Yellow clusters. Summer	.50
LYCHNIS Easy old fashioned flowers, but very showy. Any soil	
Alpina (4") A fine true alpine producing, above its little compact tufts, rosy heads of Lychnis stars in June	.40
Viscaria Fl. Pl. (12") This is a double form and a great improvement. The intense cerise pink wands of bloom come in July. Easy to grow in a sunny spot. Very good	.75
NEPETA Blue Wonder (10") Even more floriferous than Mussini	.50

Mussini (10") A mass of lavender flowers in spring. Good gray green foliage all season. Easy in dry sunny spot	.50
OENOTHERA Fruticosa (12") A glorious mass of yellow in mid-summer. Easy	.50
Minuta (8") Because it covers itself with such myriads of little yellow discs for such a long time, it is indispensable. Easy in the sun	.50
Missouriensis (Macrocarpa) (6") Huge yellow blooms. Exciting. June-August. Full sun. Drainage	.75
Missouriensis Incana (6") Form of the above	.75
Riparia (12") Red buds open to large evening prim-roses of yellow	.50
OMPHALODES Verna (6") Sprays of deep azure forget-me-nots. Spring. Half shade. Any soil	.75
PARADISEA Liliastrum (15") White stars above grassy foliage. June	.75
PENSTEMON Western Americans of great charm; their chief requirement is very good drainage. Give them a south-facing sunny slope of gravel and leafmold, or peat, and they are happy	
Fruticosus (8") Alpine. Rosy purple flowers	.75
Hirsutus Pygmeia (4") Clumps of evergreen leaves covered with lavender flowers. June	.50
Menziesi (2") Waxy foliage producing in June spikes of lavender blooms. Prostrate	.75
Pinifolius (6") Fine pine-like leaves. Flowers of brilliant red for a long time	.75
Procumbens (6") Low, slender leaved native of Colorado. Large violet rose flowers. Lovely in cascades	.75
Tolmiei (5") Dwarf; mats; dark blue flowers	.75
PHLOX A very easy genus of plants, and essential to the spring rockery. Of easiest culture in any soil. Sun and good drainage.	
Divaricata Alba (10") White form of the beautiful blue Phlox. Best in part shade. May flowering	.75
Procumbens (Amoena) (6") Easy and extra fine. Early. Rose colored. Sun. Blossoms again in autumn	.50
Stolonifera An altogether charming species blooming in spring, and often again in autumn.	
Blue Ridge Light blue	.50
Iridesceus Mauve	.50
Lavender Lady Lavender	.50
Pink Ridge Glowing pink	.50
Subulata The old time Moss Pink. Four to six inches.	
Alexander's Brilliant New, large, brilliant red	1.00
Anne Larson A new blue	.75
Apple Blossom A most appealing blush pink phlox; profuse in blooming	.50
Arbutus Lovely pale pink flowers suggestive of the color of arbutus. Not a spreader	.50
Atropurpurea A nearly true red color. Best of its shade	.50

Blue Hills	The nearly true blue Subulata	.50
Brittoniae Rosea	A clear-eyed gem in pink. Tight clumps	.75
Camla	Large salmon pink; continuous	.75
Emerald Cushion	Very different compact foliage. Pink	1.00
Intensity	New. Bright cerise on evergreen mounds ...	.75
Katherine Freeman	A lovely variety in pure pink with deeper eye. Vigorous and easy	.50
Magic	Deep reddish purple. New color and good	1.00
Ronsdorf Beauty	Dwarf, brilliant salmon	.75
Scarlet Flame	A new and intense color of Subulata	.75
Sensation	Fiery rose	.75
Sneewichen	A choice and dainty "stay-at-home", with small pure white flowers in profusion	.75
White Delight	A good new white	.75
White Tiny Tot	Miniature white. New and very nice	.75
POLEMONIUM Blue Pearl	(10") An easy and prolific standard rock garden subject. The clear blue flowers are on long pendant stems over fern-like foliage	.50
POTENTILLA	Interesting plants of easiest culture, and requiring lots of sun with good drainage.	
Aurea	(5") Green tufts. Clear yellow flowers. June-August	.50
Pyrenaica	(6") A yellow beauty from the Pyrenees....	.50
Tridentata	(6") Nursery grown native of New England. Billows of white over waxy foliage. Poor soil and good drainage. Acid	.50
Verna Nana	(2") Tiny carpeter with golden flowers all summer	.50
PRIMULA	Primroses require shady conditions with lime in the soil, ample moisture, and plenty of humus. The range of color is most beautiful and varied. There is nothing finer for spring bloom.	
Acaulis	(Barnhaven strain—mixed)	.75
	Collection: 10 our choice	6.00
Auricula Garden Mixed	Fascinating leathery leaved plants of great charm even when out of bloom. Shade and lime.	
Barnhaven strain	In shades of blue, red, yellow, purple, and the smokies	.50
Sky Hook strain	In shades of blue, red, yellow, purple, and the smokies	.50
Japonica Mixed	(Sky Hook strain) Japonicas are tall orientals with wonderfully showy candelabra heads of bloom. For shady wet locations with limed soil. Easy and beautiful	.50
Juliana Wanda	(Sky Hook strain) Dainty plants with quantities of shocking red purple flowers. May-June.	.50
Polyanthus	(Barnhaven strain—mixed) Wonderful clear shades of coral, salmon, apricot, rose, vermilion, crimson, Chinese and cherry red, blue, violet, orchid, plum, purple, etc., as well as pure white and pink	.75
	Collection: 10 our choice	6.00

Sieboldi Southern Cross (8") Beautiful species from Japan. Orchid	.75
PRUNELLA Vulgaris Alba (8") A fine white form of the common wildling. Rare	.75
Webbiana Grandiflora Rosea (6") Very showy deep pink heads of bloom over lacinated leaves. Summer	.75
PULMONARIA The lungworts are handsome foliaged ground covers for a shaded and damp spot. Either attractive waxy green leaves; or long, pointed and silver-splotched leaves. Lovely pinky blue nodding bells in early spring.	
Angustifolia Azurea (10") A plain green leaved variety with salmony pink flowers	.50
Lutea (8") Lemon yellow drooping bells	.75
Saccarata Mrs. Moon (10") White-spotted leaves, and pink to blue flowers	.50
Salmon Glow (8") Salmon pink	.75
RANUNCULUS Gramineus (10") Choice alpine. Grass-like leaves. Slender stems with many big yellow flowers	.50
Repens Fl. Pl. (6") Extremely double yellow buttercups in June. A good ground cover	.40
SALVIA Pratensis Rosea (18") A fine perennial with plentiful rosy spikes in June	.50
SANGUINARIA Canadensis (5") Native wildling of great beauty. The bloodroot is extremely early. Big open white stars. Neutral woodsy soil in half shade. Easy	.50
SAXIFRAGA Myriads of species from the temperate and arctic zones form one of the most important groups for rock gardens. The encrusted group is easy if given a limey soil, with sharp drainage and a bit of noonday shade. Most others like more shade.	
Aizoon (10") Cream colored flowers; encrusted rosettes. Easy and typical rock plant	.50
Aizoon Lutea (6") Yellow flowered form of Aizoon	.75
Aizoon Rosea (6") Pink form of Aizoon. Vigorous and beautiful at any season	.75
Allioni (3") Compact. White flowers. June. Requires shade and moisture	1.00
Altissimum (15") Encrusted rosettes send up branching heads of long lasting white blooms	.75
Cotyledon (18") Highly praised for its attractive permanently green, encrusted rosettes and its great plumes of long lasting white flowers. Rich limey loam; some shade from hottest sun	.75
Decipiens (6") Commonest of the mossy group. Numbers of large white cups in June. Always decorative plant	.50
Lingulata (10") Encrusted. White plumes. June. Lime	.75
Longifolia (15") One of the largest of the saxifrages. Tight rosettes of silvery-edged leaves send up large open heads of white bloom in June. Easy. Lime and sun	.75
Marginata (6-10") Creamy white plumes of bloom. Plants encrusted with lime	.75

Umbrosa (10")	Showy spreading heads of pink bloom above evergreen strap leaves. Shade	.75
Virginiensis (8")	Native, nursery grown. White flowered sprite of early spring. Easy. Good drainage. Sun to half shade	.50
SCABIOSA Alpina (10")	A lavender pink alpine Scabiosa	.50
Lucida (6-9")	Feather cut foliage and pinkish flowers ..	.50
Scabra (9")	Lavender heads above ample mats of deep green foliage all summer. Rare. Sun and well drained	.50
SCUTELLARIA Alpina (8")	Abundant whorls of large hooded flowers of violet with white lips. In the mint family and an easy alpine. Light soil and sun	.50
SEDUM	For the dry rock garden sedums are indispensable. They will fill the impractical spots where other plants would refuse to grow. A bit of lime is appreciated.	
Amplexicaule (2")	The plants turn to curious oat-like clusters in summer and turn green in autumn. Yellow flowers	.50
Anglicum Minus (1")	Very small Sedum. Flowers white in July	.50
Bithnicum (2")	Blue green mossy carpeter of great charm	.50
Cauticolum (4")	Rare and beautiful purplish gray foliage. Red flowers	.75
Dasiphyllum (1")	Tiny and choice. Glaucous fat leaves and myriads of pink stars	.50
Divergens (7")	Yellow blooms on interesting tiny fat-leaved plants	.50
Ewersi Homophyllum (2")	Odd form of Ewersi	.75
Glaucophylla (10")	Yellow flowers in abundance	.50
Globosum (4")	Tiny fat globular leaves. Interesting. Yellow	.50
Gracile (4")	Light green foliage masses hidden by clouds of white stars with red anthers	.50
Kamschaticum (6")	Orange flowers in July	.50
Kamschaticum Variegatum (8")	Mottled foliage in green, yellow and pink. Golden flowers	.75
Leibergi (4")	A rare western Sedum with yellow flowers in open cymes. Likes some shade	.50
Lydium (3")	The prettiest bronze green moss imaginable. Flat heads of pink flowers. Does best in part shade	.50
Maximum Atropurpureum (24")	New. None other like it. Huge heads of purplish-pink in late summer	1.00
Middendorffianum (8")	One of our favorites of the Sedum family, and always colorful of leaf and flower. Blooms deep yellow in July. Non spreader	.50
Monregalense (4")	White flowering and fine	.50
Murale (4")	A choice Sedum with flat purplish leaves and white flowers with pink centers	.50
Nevi (4")	Brownish green foliage and white flowers in three-parted rays	.50

Nicaeense (6") A heavy green moss with bright yellow heads of bloom	.50
Reflexum Cristatum (12") Large heads of yellow stars form over peculiar cockscomb masses of greenery. Odd and beautiful	.75
Sexangulare (4") Such a mass of green moss and it covers itself for a long time in mid-summer with millions of greenish yellow stars. Beautiful	.50
Sieboldi (3") Attractive rounded gray green leaves with red edges. Flowers pink in late summer and fall	.75
Spectabile Brilliant (15") Huge heads of crimson blooms on showy and stocky gray foliated plants. Beautiful in the border, or large rock garden. Easy	.50
Spectabile Variegatum (15") Beautifully variegated form of Spectabile. Same lovely autumn show	.75
Spurium (3") Flat pink heads of bloom form in summer over mats of flat green leaves	.50
Spurium Coccineum (Dragon's Blood) (4") Vibrant carmine red in August. Striking color. Easy in sun	.50
Stenopetalum (3-4") American. Dense leaf growth and sprays of pinkish white flowers	.50
Stoloniferum (8") Gray-green leaves; heads of pink stars	.50
Ternatum (6") Flat leaved spreading gray green plants with triangular heads of typical Sedum stars in white	.50
SEMPERVIVUM (Hens and Chickens) As a group the "hens and chicks" add a charm of unique beauty. The matted foliage, changing with the weather and different soils, is always interesting and the peculiar star shaped flowers are most unique. Perfectly hardy and easy.	
Alpha Medium sized. Extra tight growth. Rosy	.50
Alpina	.50
Arachnoideum The cobweb "hen and chick." A treasure for its gray webbing when in full growth. Nice bright pink flowers	.50
Calcareum Medium sized. Green and red combination	.50
Celon Bronzy red and medium sized. Good	.50
Globiferum Medium sized. Green. Tiny globular chicks. Shades of red in winter	.50
Malby's Hybrid Large English hybrid. Very good	.50
Mitchell's Hybrid Beautiful and choice combination of red and green	.50
Plush Carpet Small. Fascinating colors in mossy greens and reds. Very fine	.50
Powellii	.50
Pyrenaicum	.50
Rubicundum	.50
Silverine Large. Silvery green. Gorgeous	.50
Spinosum Extra choice. Spiny cushions	.50
Tectorum Large. Green with reddish edge	.40
SILENE Acaulis Peduncularis (2") One of our first loves. Dainty yet hardy. Rose pink flowers just above the foliage all summer	1.00

Alpestris (6")	Panicles of exquisitely dainty white flowers. May to August. Alps. Sun	.50
Caramanica (15")	Slender wands of bright pink flowers. Tufted evergreen plants. June. Easy in any soil	.50
Wherryi (6")	Large flat truly pink flowers on compact plants	1.00
SOLIDAGO Cutleri (6")	The first native alpine which we are offering. Showy goldenrod over evergreen mounds. Drainage and sun	1.00
STACHYS Lanata (10")	(Lamb's Ears) Extremely wooly ample leaves. Very decorative	.50
THYMUS	Beautiful fragrant ground covers in great variety. Like it hot and dry and a lean soil. For stepping stones, terraces, and the rock garden.	
Adamovici	Rare, low growing creeper. Rosy heads of bloom. It is fine for walks and terraces, or choice in the rock garden	.50
Balticum (6")	A ground cover of great excellence. Lavender flowers	.50
Citriodorus Aureus (4")	(Lemon Thyme) Lemon scented leaves. Lavender flowers	.50
Doeffleri Minus (2")	A dwarf creeper. Purple red flowers. June-July	.75
Lanuginosus (2")	(Wooly Thyme) Spreading masses of delightfully fragrant gray green. Wonderful for stepping stones	.50
Nummularis (4")	Lavender flowers on shiny Thyme leaves in mid-summer	.50
Serpyllum Album (2")	Truly beautiful cascading down a large rock face and it is so hardy	.50
Serpyllum Coccineus (2")	The red flowered form of Serpyllum	.50
Serpyllum Roseus (2")	Rosy flowers cover the mats of fine foliage in early summer	.50
TOWNSENDIA Exscapa (2")	Large pink daisies in spring. Give good drainage in sun	.75
Parryi (6")	Splendid blue-purple daisies above neat leaf tufts. Same culture as above	.75
TROLLIUS Ledebouri (24")	Large golden cups open upward and are filled with showy large golden stamens. Unique and a delight to the arranger	.75
Lemon Globe (20")	A beautiful lemon yellow Trollius	.75
TUNICA Saxifraga Fl. Pl. (10")	Tiny tight double blooms, in a nice pink color, practically smother the fine leaved plants in August. Very choice, but easy and hardy	.75
VALERIANA Montana (2")	Alpine. Clear pink clusters on compact tufted plants	.50
VERBENA Canadensis (4")	A truly hardy Verbena. Trailing and with many rosy flower heads all season. Easy	.50
VERONICA	Standard rock garden plants. No rock garden should be without several varieties. Easy to grow anywhere in full sun, and practically any type soil.	

Armena (3")	Gentian blue flowers on attractive trailing plants	.50
Austriaca (15")	A taller growing fern leaved variety with star-like blue flowers	.50
Barcarole (10")	Rosy red numerous spikes combine with attractive foliage to make a fine display in August. Easy	.50
Blue Peter (12")	Showy deep blue. Bushy plants	.50
Chamaedryas (8")	Showy blue flowers in June	.50
Corymbosa Stricta (8")	Spikes of violet purple in late summer	.50
Filiformis (1")	A rampant ground cover with perfectly charming bright-eyed lavender Veronica flowers in June. Prefers shade	.50
Gentianoides (10")	Large pale blue flowers, with darker veins, in spikes above showy strap leaves	.50
Gentianoides Nana (4")	Good dwarf form of the above. Flowers the same	.75
Guthrieana (8")	Lovely, both in foliage and light blue flower	.75
Holophylla (Vivid Blue) (15")	A taller growing upright Veronica, with attractive glossy leaves and vivid blue spikes	.50
Incana Blue (12")	Silvery gray green foliage and blue spikes	.50
Incana Rosea (10")	One of the most beautiful plants we have. Gray wooly foliage carries numerous spikes of just the right clear pink flowers	.75
Pectinata Alba (1")	White form. Very beautiful	.50
Pectinata Rosea (1")	Mats of wooly leaves and rose red flowers. Good	.50
Pimeleoides (1")	Violet flowers bedeck loosely arranged bluish leaved branches. Charming plant	.50
Prostrata (4")	Rare. Intensely blue flowers. Very good	.75
Repens Alba (1")	Beautiful bluish white flowers cover the low ground-hugging mats in June	.50
Repens Blue (1")	Tiny creeper with blue masses of flowers in June. A choice variety	.50
Rupestris Alba (6")	White form of Rupestris	.50
Rupestris Rosea (6")	Mid-summer spikes of starry pink blooms. Plants form mats of foliage	.75
Spicata Alba (10")	Beautiful white spires in quantity ..	.50
Spicata Corymbosa (8")	Beautiful blue spikes. Summer	.50
Spicata Nana (4")	A perfect dwarf plant, with tiny spikes of intense blue. A gem	.50
VINCA Minor Alba	White flowered form of the well known ground cover	.50
VIOLA Sagittata (3")	Native violet of great beauty and freedom. Dry banks	.50
Miss Willmotte (5")	A very satisfactory violet. Mauve pink	.50

HARDY NATIVE FERNS

Since we feel that ferns have a definite place in parts of the rock garden, or as background material in any garden, we are offering the following species. Nothing can replace their lacy beauty along a wooded path or by water; as a foil for blooming plants or on the shaded north exposure of a building.

ADIANTUM Pedatum (Maidenhair Fern) (18") One of the most choice Ferns. Easy to grow in neutral soil. Most beautiful in shade	.75
ANTHYRIUM Filixfemina (Lady Fern) (2-3') Very easy to grow in any good leafy soil. Prefers part shade	.50
CYSTOPTERIS Fragilis (Fragile Fern) (10") Usually grows in rocky formations, but can be adapted to many locations in the partly shaded rock garden. Neutral soil	.75
DENNSTEDTIA Punctilobula (Hayscented Fern) (15") Sun or shade in well drained soil will please this very lacy Fern. Easy	.50
DRYOPTERIS Cristata (Crested Shield Fern) (2') The ideal Fern for hummocks in wet land. Prefers shade	.50
DRYOPTERIS Disjuncta (Oak Fern) (4") The tiny Oak Fern is at home in rich humus in the shade	.50
DRYOPTERIS Marginalis (Evergreen Fern) (15-20") Truly evergreen, bold leathery fronds in beautiful vase formation. Loves to grow among stones. Shade	.75
DRYOPTERIS Noveboracensis (New York Fern) (12") Light green perfectly tapered fronds make spreading masses in well drained woodsy soil. Half shade	.50
DRYOPTERIS Phegopteris (Narrow Beech Fern) (8-10") It places all its fronds pointing in the same direction. On well drained banks in part shade. Beautiful	.50
DRYOPTERIS Spinulosa var. Intermedia (Fancy Fern) (12-15") Perhaps the finest-cut of all our native Ferns. Found in nature in acid shady woodland	.50
OSMUNDA Cinnamonea (Cinnamon Fern) (3') Wet or dry; sun or shade. It is not a difficult Fern to please. Vase formation with cinnamon fruiting fronds in the center	.75
OSMUNDA Claytonia (Interrupted Fern) (4-6') Very large but lovely Fern. Plant in wooded edges and damp places	.75
POLYSTICHUM Acrostichoides (Christmas Fern) (1-2') Evergreen. Rich woods soil in shade, or part shade. Likes rocks	.75
PTERETIS Pennsylvanica (Ostrich Fern) (4-6') A perfect vase shape of elegant "ostrich feather" fronds. Deep rich loam where dampness prevails	.75
WOODSIA Ilvensis (Rusty Woodsia Fern) (6") Beautiful gray-green fronds in tufts. Prefers to grow out of rock crevices in the sun or half shade	1.00

GIFTS

We would like to suggest that gift boxes of our hardy plants would be most acceptable to your gardening friends. We will be happy to pack and ship such orders (minimum \$4.00) in season, and will forward our card to each recipient at the date you designate.

USEFUL BOOKS FOR THE ROCK GARDENER

Farrer: The English Rock Garden (2 vol.)

Klaber: Rock Garden Plants

Macself: Simple Rock Gardening

Thornton: Rock Garden Primer

Walker: The Alpine Garden

Alpine Garden Society: Rock Gardener's Bedside Book
(This is English and available in this country.)

TO HELP THE BEGINNER

(Rock gardening is easy and fascinating)

Do—Choose a well drained spot away from encroaching tree roots and with ample sunshine and air. Some high shade is welcomed by some species, especially about midday.

Do—Use your own native rock. It blends better with your surroundings.

Do—Choose the easier and hardier plants for a start. The choice and rare species can come later as you gain experience.

Do—All the reading you can on the subject.

Don't—Plant your plants too closely. They will grow larger.

Don't—Make your soil too rich. Use plenty of gravel or sand for drainage and add humus in the form of peat or leafmold.

Don't—Stand your stones up like headstones. Study the way rocks lie in nature and try to imitate.

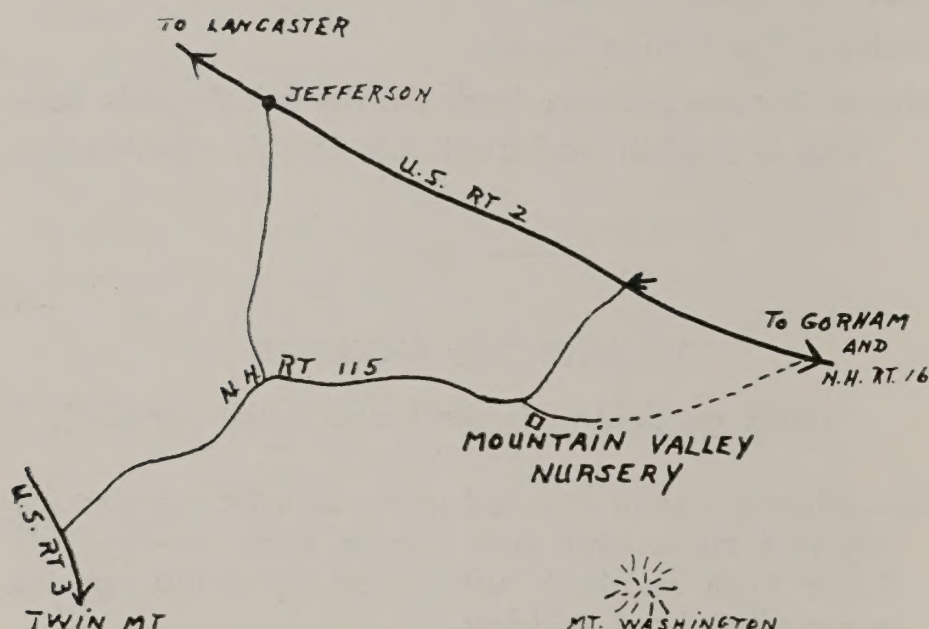

BEGINNERS COLLECTIONS

Our choice of plants, full price range.

25 Easily Grown Plants (25 varieties)	\$ 9.00
50 Easily Grown Plants (50 varieties)	17.50
12 Scree Plants (12 varieties)	5.00
12 Paving Plants (12 varieties)	5.00
